

Create a gmail address for your child

 **Important:** This email address will be managed by you (the parent) and will only be used for collaborative digital activities.

 **Pre-requisite:** At least one parent must already have a Gmail account.

Create a gmail address for your child.....	1
Step 1 – Create your child's Gmail account.....	1
Step 2 – Link the account to a parent.....	2
Step 3 – Controlling your son's activity on their gmail account.....	3
Step 4 – Wrap up.....	4

Step 1 – Create your child's Gmail account

1. Go to the [Google account creation page](#)
2. Enter your child's First Name and Last Name.
3. On the next page, fill in the General Information:
 - a. Date of birth
 - b. Gender
4. Continue to the page "How you'll sign in"
5. Enter a username
 - a. The simplest format is usually: **firstname.lastname**
 - b. Do not enter [@gmail.com](#) - it is already included on the right. So if you want the email address to be [nicolas.bancel@gmail.com](#) simply enter **nicolas.bancel**
 - c. Hit Next. You may have to iterate a bit if the usernames are already taken

6. Choose a password for your child's account.  **Write down the email address and password you've created.**

7. You may be asked to provide a phone number (enter yours) to verify you're not a robot. A confirmation code will be sent to you by SMS within seconds.
8. **Next steps are for parents** : provide the email address of the parent that will control your child's email address. So if you're the parent, now enter your gmail address.
9. **Now please accept all general conditions (you'll be able to configure accesses and controls in the next steps, don't worry)**

☒

J'autorise Google à créer un compte Google pour mon enfant et à traiter ses informations tel que décrit ci-dessus et tel que détaillé dans l'Avis de confidentialité concernant les comptes Google gérés avec Family Link et dans les [Règles de confidentialité de Google](#). Je déclare sous serment être le représentant légal de mon enfant et être autorisé à donner cet accord.

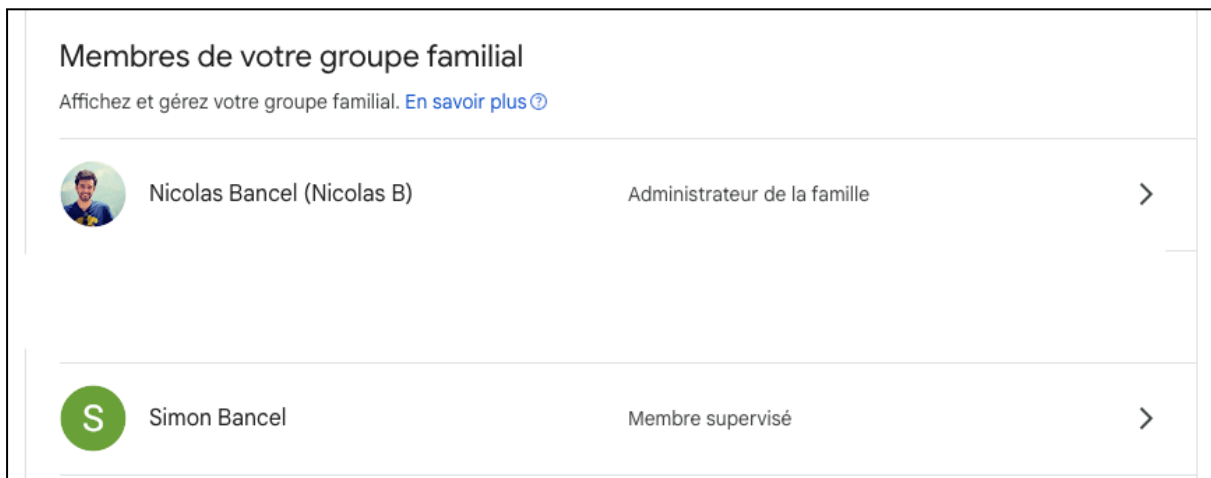

☒

Je comprends que le compte Google de mon enfant est semblable au mien et qu'il lui donnera accès à des services grand public non conçus pour les enfants. Ces services lui permettront notamment de communiquer avec d'autres utilisateurs et de consulter des contenus que je pourrais considérer comme inappropriés. J'accepte également au nom de mon enfant les [Conditions d'utilisation de Google](#) et les [Conditions d'utilisation de YouTube](#) (deux documents qui incluent des informations sur mon droit de rétractation de 14 jours), ainsi que les [Conditions d'utilisation de Google Play](#). Je comprends aussi que toutes les conditions s'appliquent à mon compte et à celui que je crée pour mon enfant.

10. **Chose settings for [your son]** : pick the "Chose in more steps" option. In the next steps, here's what I suggest **Note : those parameters can be changed later on. And all history etc can in any case be deleted manually.**
 - a. **For more personalized experiences, save Nicolas's Web & App Activity** : "Keep history for 18 months" (you can select Don't save xxx's Web & App Activity). It's simply that if your kid is using websites in the scope of the project, it will be easier for them to find them back. But nothing mandatory here at all
 - b. **For more tailored YouTube recommendations, save Nicolas YouTube History** : same as above, I recommend "Keep activity for 36 months", but you can do "Don't save xxx's YouTube history"
 - c. **Link Google services to let them share data with each other** : "Don't link these services"
 - d. **Choose whether xxxx can manage these controls** : "Only parents"
11. Confirm your choices
12. On the next page : "Privacy", hit **"I agree"**
13. Now you should go to your personal email address (the parent), and confirm

Step 2 – Link the account to a parent

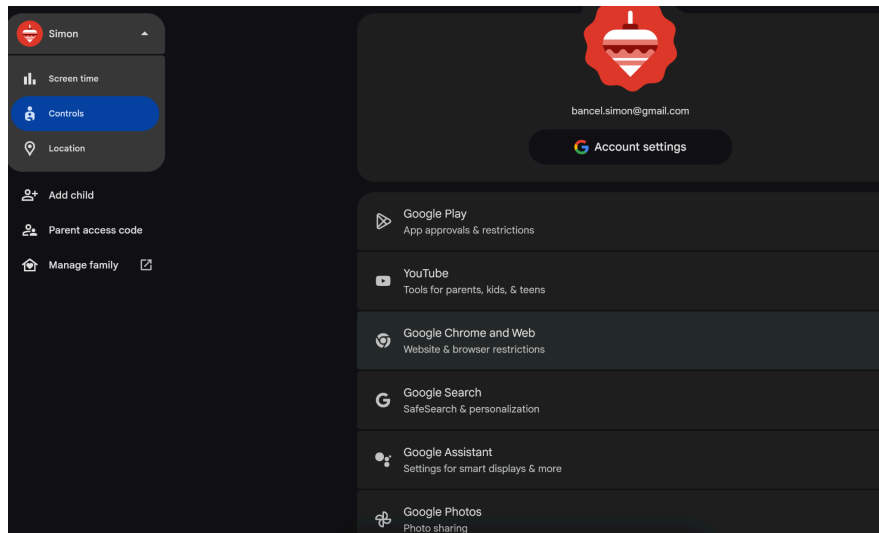

1. You may have to confirm the parent email address : go to your personal email address (the Gmail account of the parent managing supervision).
2. Accept Google's Terms and Conditions
3. Answer a few short questions to setup parental controls for your child's account
4. I recommend you also setup Family Link
 - a. Go to <https://myaccount.google.com/family/details> from your personal gmail account
 - b. Add your son's email address to your "family" (by clicking on "Send invitations")

- c. Now you should go to your son's email address and accept the invitation to "join your family"

Step 3 – Controlling your son's activity on their gmail account

- Now that
 - Your son has an email address
 - It is tied to your personal email address
 - You can now control their activities using Family Link
- Click here while being connected to your gmail account [Google Family Link](#). Now you should be able to control the parameters from there directly

Step 4 – Wrap up

- **PLEASE test the full flow on your kid's tablet. Have your child :**
 - Open an incognito window (or disconnect from all your gmail accounts)
 - Go to the gmail sign in page <https://accounts.google.com/signin>
 - Have your kid enter
 - Their new email address
 - Their password
 - It may send you a verification code via SMS
- **Also, please have your kid write down**
 - **Their email address**
 - **Their password in their agenda / homework diary**
